

Name: _____

Country Profile

Country Name: _____

Country Location: _____ (Continent) _____ Hemispheres

Country Demographics:

Population	Growth Rate	Death Rate	Life Expect.	Literacy Rate	% below Poverty	Per Capita GDP	Other:	Other:	Other:

1. What factors do you think affect your country's population growth?

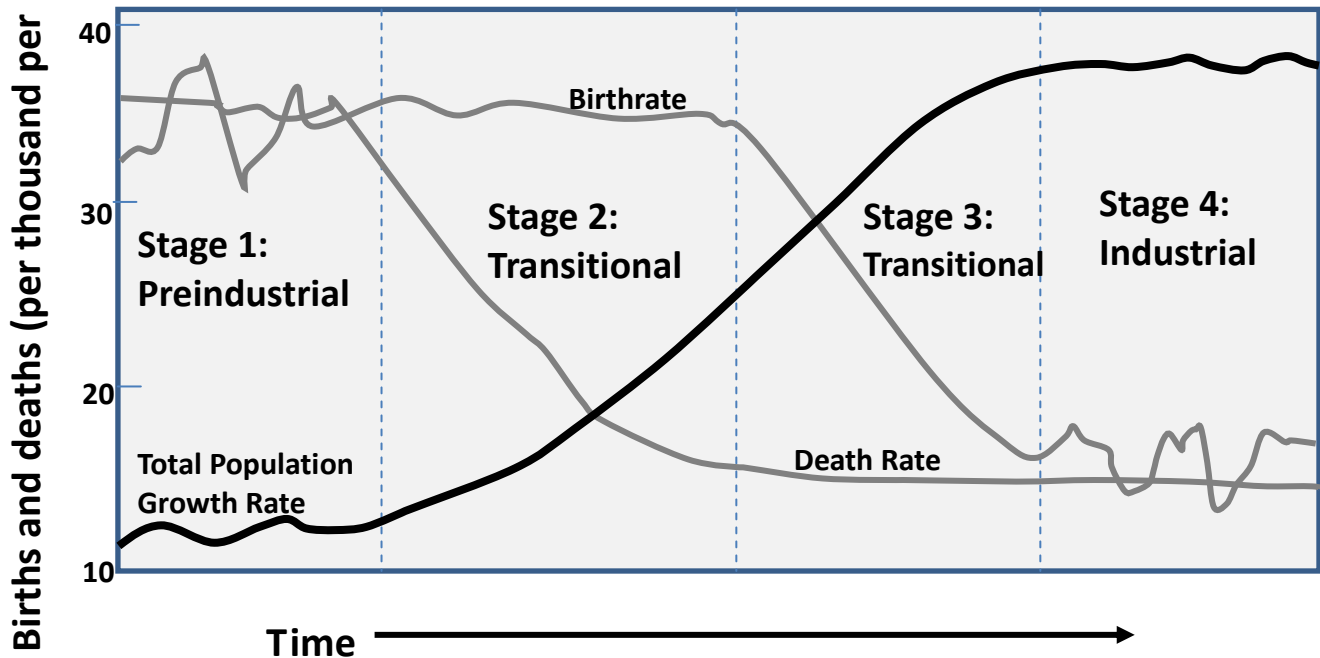

2. List three relationships you see in demographics:

For example, the countries per capita GDP may be very low and so is the life expectancy. What type of relationship exists between these two demographics? And why?

Demographics	Relationship
<i>Ex. Infant mortality rate</i>	<i>Ex. Lower infant mortality rate, increase in number of doctors;</i>

Name: _____

Country Profile

Directions: Color or circle the stage in which you think best represents the stage of development for the country you have profiled.

Finish this assignment by writing a brief report explaining the level of development of the profiled country. Be sure to explain why your selections in the demographic transition chart. Include proper demographic concepts like birthrate, death rate, infant mortality, education, gender issues, health, etc. Use evidence from the profile chart to support your findings.
